

General Description

This precision 75Ω BNC Connector is a right angle mounted PCB connector with a selection of different leg lengths available. It also features Pathfinder™ light pipe technology which aids port identification. With a centre line of 4mm above the board, its low profile permits closer packing densities of daughter boards, which allows reduction in the bulk of routing and switching equipment.

This connector was formerly sold as:
 C-SX-069G when supplied with ANB-H0-ABN-2.50 and AWB-S0-ZBN-0.50
 C-SX-088G as the connector part only
