

### General Description

This high quality, cable mounted plug features a robust two piece body with a screw lock body clamp design. Its insulated core is enclosed within a durable metal shell equipped with a secure press locking mechanism, making it an excellent choice for traditional audio cable assembly applications. The body is precision die cast from zinc alloy and lathe finished for enhanced accuracy, strength, and durability, then nickel plated for added corrosion resistance. Precision machined brass pins are silver plated to deliver superior conductivity and audio performance. The integrated strain relief system supports cable diameters up to 6.4mm.
