

General Description

This high quality 3 pin panel mount XLR plug features a square plastic shell constructed from PA-6 glass fibre reinforced material, providing outstanding strength, dimensional stability, and long term durability. Designed with straight pins for direct PCB mounting, it offers a compact and reliable interconnect solution for space-constrained applications.

The precision machined brass contacts are silver plated to deliver superior conductivity, corrosion resistance, and a long service life. Ideal for professional audio, broadcast, and industrial signal applications.

Key Features:

- 3-pin XLR plug (male), panel-mount type
- Durable PA-6 glass fibre reinforced plastic shell
- Straight pins for PCB mounting
- Precision-machined brass contacts with silver plating
- Excellent electrical performance and corrosion resistance

Electrical

Current Rating	6A
Dielectric Withstanding Voltage	1500V DC
Contact Resistance	<5mΩ
Insulation Resistance	>1GΩ

Processing

Temperature	-30°C to +80°C
Push Button	No
AWG	24 to 26 AWG

Environmental

Insertion Force	≤20N
Mating Cycles	>1000

Materials

Centre Pins	Brass/Silver
Body	PA-66 Glass Reinforced Nylon
